OBJECTIVE

Computer Science student and dedicated problem-solver with a passion for technology and cybersecurity. I thrive in challenging environments and aim to contribute meaningfully by applying my technical and analytical skills while continuously staying updated with the latest industry developments.

EXPERIENCE

AI and Data Developer Intern

Mar 2025 – Present

Grayson Sky, Philadelphia, USA

- Developed AI models for predictive analysis on customer data, improving forecasting accuracy by 18%.
- Designed automation scripts to optimize data ingestion pipelines, reducing processing time by 35%.
- Supported data classification and threat modeling initiatives in collaboration with cybersecurity teams.
- Designed RESTful APIs for internal data visualization tools using Flask and Python.

Web Development Intern

Mar 2025 – Present

Philly AI Connect, Philadelphia, USA

- Spearheading the development of the organization's official website to improve digital presence and engagement.
- Designed and implemented responsive UI components using HTML, CSS, and JavaScript.
- Collaborating closely with the product team to align the design with branding and user experience goals.
- Ensuring cross-device and browser compatibility while maintaining code performance and scalability.

CERTIFICATIONS

[ISO 27001:2022 – Information Security Associate](#)
[AWS – Cloud Practitioner Essentials](#)

SKILLS

Security Frameworks & Compliance

ISO 27001:2022, SOC 2, GDPR, NIST, CIS, PCI DSS v4, HIPAA

Tools & Technologies

UEM, MDM, MITRE, OWASP, Burp Suite, Docker, Wazuh, NIDS

Programming Languages

Python, Java, JavaScript, HTML, CSS

Soft Skills

Leadership, Teamwork, Creativity, Problem Solving, Time Management

PROJECTS

ISC Website

Jan 2025

Tech Stack: HTML, CSS, JavaScript

Philadelphia, USA

- Developed a responsive portfolio website for ISC – Innovative Study Circle, showcasing the center's mission, testimonials, and success stories.
- Integrated mobile-friendly design to improve user experience and boost engagement.
- Delivered a polished, fully functional site, demonstrating strong front-end and UI/UX skills.

MITRE Engage Integration in TPOT Honeypot

Nov 2024

Tech Stack: Docker, Wazuh, Suricata

Philadelphia, USA

- Integrated MITRE Engage framework with TPOT honeypots to boost threat detection.
- Used Docker for deployment, Wazuh for monitoring, and Suricata for traffic analysis.
- Achieved 30% increase in threat visibility and response capabilities.
- Demonstrated expertise in security automation and layered defense.

EDUCATION

Master of Technology (Cybersecurity)

Sep 2023 – Present

Drexel University, Philadelphia, USA

Relevant Coursework: Cybersecurity, Cryptography, AI & ML, Networking, Operating Systems.

Bachelor of Technology (Big Data)

Jul 2020 – Aug 2023

Presidency University, Bengaluru, India

Relevant Coursework: Hadoop, Spark, Networking, Distributed Databases.
